

Needle Free Collagen Induction Therapy

I _____ hereby give my consent to undergo Needle Free Collagen Induction Therapy provided by _____ (Medical Aesthetician) at The Aesthetic and Wellness Center.

Needle free collagen induction therapy is a non-invasive procedure, where short electrical modulated pulses of alternate current are used to create temporary openings in the skin. This method is known as "Electroporation".

Electroporation is a process that uses high-voltage current to make cell membranes absorbent to allow the infusion of active ingredients (such as vitamin C, hyaluronic acid, etc.) to penetrate deeply and effectively into the dermis, nourishing the skin and stimulating the regrowth of collagen. This procedure is painless and it acts as a virtual syringe. A series of 6 to 10 treatments are recommended and the frequency will depend on the skin's condition and intensity of the treatments.

Needle Free Collagen Induction Therapy is contraindicated in following cases:

- Individuals with pacemakers, artificial heart valves or other active implants.
- History of epilepsy
- Pregnant women
- Skin outbreaks or on infected tissue
- Metal plates or other metal objects
- Patients on chemotherapy, radiation therapy and high doses of corticosteroids

I understand that there are some risks with any procedure. Most patients may not experience any side effect after treatment; however, the following are possible reactions with needle free collagen induction therapy: redness or skin rash, inflammatory and allergic reactions.

I understand that needle free collagen induction is not a surgical procedure and is in no way intended as a substitute for cosmetic surgery.

By my signature, I certify that I have thoroughly read and understand the contents of this form and the disclosures listed above were made to me. I acknowledge that no promises or guarantees have been made to me as a result of the treatment.

I am aware that the results achieved by this treatment may vary from person to person. Some patients typically notice an immediate glow, but visible improvement will take about 2-4 weeks and can continue for up to 6 months.

I have read potential risks have been explained to me and I accept them.

I hereby give my voluntarily consent to have this treatment perform on me.

Micro-needling & Needle Free Collagen Induction Therapy Pre-Treatment Instructions

Preparing Skin:

1. Use Cellular turnover treatment daily at bedtime for 2 weeks. Discontinue application one week prior to treatment.
2. Apply Vitamin C serum at bedtime for two to three weeks.
3. Avoid sun exposure or tanning bed at least 4 weeks prior to treatment and during treatment process.
4. Do not exercise the day before or for 48 hours after the injection treatment.
5. Avoid caffeine containing food or beverages day of treatment.
6. Avoid medications such as: Aleve, Advil, cold remedies, Vitamin E or aspirin 5 days prior to treatment.
7. Avoid Retin-A, chemical peels, injectable fillers or Botox 2 weeks prior to treatment.
8. Use a sun block with an SPF 30+ with UVA/UVB Broad Spectrum protection.
9. Start Arnica 3 days prior to treatment as directed.
10. Apply topical anesthetic cream 1 hour prior to procedure and reapply if necessary.
11. Notify medical aesthetician if you get cold sores. You will require an anti-viral prescription to avoid any breakout after treatments.
12. If you have open cuts, wounds, abrasions or during acne or cold sores breakouts, we cannot perform the procedure.
13. Eat a healthy diet, whole food vitamins and daily omega 3 fish oil. It is also advisable to take 1000 mg of vitamin C and 2000 i.u. of vitamin D3. This ensures an increase in vitamins internally and externally and will greatly aid in the healing process.
14. Drink 8 glasses of water/non-caloric fluids per day.

Needle Free Collagen Induction Therapy **Post-Treatment Instructions**

1. Avoid excessive sweating for a minimum of 24 hours after treatment.
2. Cleanse your face or area treated daily with a gentle cleanser.
3. Avoid direct sunlight for 72 hours after treatment. If outdoor activities are planned, wear a wide brimmed hat and sunblock with an SPF of 30 or higher.
4. If redness or sensitivity occurs, wash your face and apply cool compresses or ice packs. If sensitivity continues for more than 24 hours, call the office.
5. Do not apply any type of glycolic, lactic, salicylic, exfoliating products or Retin-A for at least two weeks after treatment.
6. Do not peel, pick or scratch the skin at any time; this will cause severe scarring and discoloration to the treated area(s).
7. If crusting occurs, apply petroleum jelly to affected area until healed.
8. Keep your skin well-hydrated with appropriate moisturizer. Your skin care specialist will recommend the best medical grade skin product for your skin type.
9. Call the office immediately if you experience any increased pain, redness, weeping or blistering, or have any questions about your skin care after treatment. Please call us at 941-749-0741.
